Abstract

The project, Hotel Management System is a web-based application that allows the hotel manager to handle all hotel activities online. Interactive GUI and the ability to manage various hotel bookings and rooms make this system very flexible and convenient. The hotel manager is a very busy person and does not have the time to sit and manage the entire activities manually on paper. This application gives him the power and flexibility to manage the entire system from a single online system. Hotel management project provides room booking, staff management and other necessary hotel management features. The system allows the manager to post available rooms in the system. Customers can view and book room online. Admin has the power of either approving or disapproving the customer's booking request. Other hotel services can also be viewed by the customers and can book them too. The system is hence useful for both customers and managers to portable manage the hotel activities.

THE
MOTIVE

The motive of our project is to control various activities performed. In the Hotel using the computer with the work of HOTEL MANGEMENT SYSTEM. From the beginning, the important thing in our mind is that we should concentrate our project work on a subject that is easy to understand and is according to our daily requirement. By keeping this in mind, the subject chosen by us is hotel management.

In the present time there is a great rush in hotels, as these have become necessity for middle and upper class of the society. People travel a lot, stay in hotels, goes to the hotels for functions, meeting and refreshment. Our project is developed keeping in mind the general needs of the customers when he goes to the hospital. An important uniqueness about the described Hotel's restaurants and bar are available to only those customers who have already booked room or hall in hospital.

INTRODUCTION TO PROJECT

The name of project is "Hotel Management". The objective of the project is to computerize the system of the hotel. "Hotel Management" is the project not only keeps the record of various people like customers, manager etc. but as well as it reduce the extensive paper work in the present system. It wills maker the system more versatile and user friendly. It also calculates the proper billing slip of high level and middle level customers. This project is based on description about the structure of HOTEL MANAGEMENT SYSTEM.
The project contains:

- Keeping the record of all persons like customers, managers etc.
- Maintains proper list of all persons.

Conclusion

Computer has got clear advantage over the manual system. The computerized system is more reliable, efficient and fast at the end of the project, I can say that computer play a very crucial role in the development of firm. All the daily reports generated by the system are to be checked by the concerned official so as to ensure that all the transactions have been put through in appropriate accounts and this is tallied with the new vouchers.

Computer does maximum work with in minimum time. Because it is used in every field so that it provides comfort and suitability to everyone. Providing maximum facilities and comfort to customers to customers is main goal of the firm. To achieve this goal, other modern facilities relating to computer should have to be provided.
